

International Graduate Programme - Technical Graduate

Ross on Wye, Herefordshire with International Placements

REHAU is the premium worldwide brand for polymer-based innovations and systems in construction, automotive and industry. From furniture to windows to aircraft, you encounter our systems every day, without noticing them. While they may be invisible, their benefits are always around us. More than 20,000 employees at 170 locations worldwide apply their expertise and innovative capabilities to ensure the continuous growth of our independent privately-held company. REHAU is the place to build a career, so why not join our team and contact us today!

Your role:

The successful candidate will undertake the REHAU International Graduate Programme. Within the role, the successful candidate will be an integral part of the Technical team providing business support to the UK Window Solutions division.

You will work on developing new and existing products, with the aim of extending and refining REHAU's extensive range, ensuring that we maintain our position as an innovative, leading systems supplier to the Global Fenestration Industry. The role will involve working closely with our Window Solutions sales team, our North Wales extrusion factory and our extended development teams in Germany, as well liaising directly with customers and suppliers in the UK.

Alongside this, the successful candidate will have the opportunity to undertake a wide range of training courses and complete an international project, working with international colleagues and undertaking international placements at REHAU locations globally for 4-6 months, during the programme.

The role is based at our Ross on Wye Head Office, with travel to our European and International Offices for training and placements. The planned start date for this role is Tuesday 27th August 2024. Further information on the International Graduate Programme can be found at: <https://www.rehau.com/sites-de/international-graduate-program>

Your profile:

The ideal candidate will have an appetite for product development and technical application of products for the construction sector and have experience of working with suppliers, customers and product design, ideally within the Fenestration industry (desired). You will ideally be familiar with manufacturing processes such as extrusion, injection moulding and fabrication. You may have an understanding of quality standard ISO 9001 and environmental standard ISO 14001; and their application. You should have well-developed IT skills, including the use of 3D modelling (use of Solidworks would be preferred). Competency in SMART-home, digital technologies and sustainable product design is also desirable.

- Graduated with a master's degree during or after 2021, preferably in Mechanical Engineering/Design or similar;
- Possess 3 months' work experience, in direct employment or an internship, experience (manufacturing/fenestration environment is preferred);
- Possess experience of working internationally either through studying abroad or, work experience (desired);
- Level B2/C1 standard in English (essential);
- Proficiency in a second language (German desired) is preferred however, GCSE / A Level qualifications in another language will be considered;
- The position requires international travel and therefore openness to mobile working is essential;
- Ability to work to deadlines.
