Enhancing lives

SLINOVA The slimline sliding door

**Modern,
slim, secure
& energy
efficient**

Opening out to a superb panoramic view, flooding the room with light

Outstanding performance and design for modern, energy-efficient homes.

SLINOVA creates harmony between interior and exterior with its slim design and extensive glass surface.

Opening in one smooth movement, enter a world where performance and design are one and the same. Offering you more light and comfort, SLINOVA blends into your living space, letting more of the outside in.

Let the light in

The benefits of natural light

- Improves your mental wellbeing
- Helps you sleep better
- Improves your concentration
- Reduces the need for artificial light
- Increases focus and energy levels
- Strengthens the immune system

SLINOVA: The bright choice

Maximise natural light with SLINOVA's large glazing area

SLINOVA is a slimline sliding door with outstanding stability and strength.

A discreet 80mm frame depth

Increased airflow and circulation due to larger sliding element

Easy to operate, durable, low maintenance and easy to clean

Makes a room feel more spacious

Allows nature and the outside environment to become part of your home

A colour for all

Colour that lasts

Every SLINOVA door has the option of featuring the same colour finish inside the home, for a custom look.

Your style down to the last detail

Make a statement with the unique SLINOVA sliding door.

Bring in the colour

The SLINOVA sliding door can be customised to your specifications. In addition to providing you with day-to-day comfort, it enhances the architecture of your home. Choose the colour and design that best suits you from the REHAU colour range.

A window to your world

More space

Today's new homes offer increasingly smaller rooms. Thanks to its large openings, SLINOVA gives you the impression of open space, granting you a superb view of the outside.

Bring the outside inside

SLINOVA makes the transition from indoors to outdoors much smoother, in a single simple and light movement. Its minimalist design allows for a clear view to your world.

A range of design configurations that adapt to your home

Single moving pane

Two moving panes

Three moving panes

Two moving panes opening from the centre

Four moving panes opening from the centre

Style and design

- Flexibility of dual and triple track system allows for a large number of sliding door combinations.
- 2, 3, 4 and 6 pane options opening from either left, right or even from the centre for complete flexibility.

Peace of mind

Security guaranteed

REHAU SLINOVA doors are tested to the highest security standard giving you an added level of security to your home and family.

- 1 Specially-designed, discreet hardware makes the locks completely invisible within the sash
- 2 Standard 6-point locking mechanism
- 3 Easy and convenient opening
- 4 Multi-point locking system
- 5 3-star lock cylinder
- 6 Stainless steel hooks for extra security

Stainless steel hook for extra security.

Aluminium anodised keep for enhanced aesthetics.

A choice of durable and resource-efficient windows and doors

We help you to become more environmentally responsible, by offering you high quality products that help protect the environment.

Production

Our partner customers produce EcoPuls labelled profiles, to bring you eco-designed, sustainability-produced products that **save up to 97,000 tonnes of CO₂ per year.**

Manufacturing

REHAU manufactures profiles with the EcoPuls seal of approval in our Vinyl Plus certified factories, due to their sustainable production processes. Thanks to the co-extrusion process, REHAU combines recycled and virgin raw materials without impairing the performance and usability of the new profile.

Installation

REHAU products with the EcoPuls label are then installed in your home by our network of partners, **save 13 kg of CO₂ in replacement and 17 kg of CO₂ in new construction, per window.**

Collection

Every year, **millions of old PVC windows, doors and production offcuts** are reused in the production of new profiles with the EcoPuls label. For this reason, REHAU maintains an extensive network for the collection of these materials.

Our circular economy

**REHAU
EcoPuls**

Sustainable
Development

Recycling

Collected old windows, doors and production off-cuts are carefully selected and sorted into different raw materials (e.g. glass, PVC and steel) and then recycled. The PVC components are then processed into high quality granules. The production of EcoPuls PVC recycled profiles **saves up to 88% in CO₂ emissions**, compared to the production of a standard profile on the market.

REHAU Group's recycling facilities, include our Polish plant in Śrem, with its own state-of-the-art recycling works, as well as our subsidiaries, PVCR in England and DEKURA in Germany. These locations are responsible for the central collection of used material and its processing into reusable materials. As an industry specialist, DEKURA produces around 40,000 tonnes of material for new PVC windows.

Technical information

SLINOVA sliding door

Frame depth	Double frame 80mm, Triple frame 146mm
Sash depth	54mm
Assembly	Welded sash, welded frame or mechanical joint frame only
Material	REHAU EcoPuls PVC profile, with steel reinforcement according to the system manufacturer's specifications. Sash and frame with a minimum of 40% to 75% recycled PVC, Vinyl Plus certification.
Seals	The seal between the door frame and the sash is ensured by two circumferential brush seals. The glazing seal in the sash is welded in the corner area.
Maximum glass thickness	32mm
Maximum sash weight	Up to 150kg
Maximum dimensions (WxH)	4m x 2.4m
Wind load resistance	Up to class B2/C1 according to DIN EN 12210
Rain permeability	Up to class 7A according to DIN EN 12208
Air permeability	Up to class 4 according to DIN EN 12207
Sound reduction	Up to $R_{w,P} = 33\text{dB}$
