Glass-effect tambour doors

Coordinated design for storage and front panel –
RAUVOLET crystal-line

interior.rehau.uk/tambourdoors

Ample storage space.
High quality, modern look.
RAUVOLET crystal-line
gives you all this and more.
It combines the advantages
of glass plus those of
polymers and is therefore
more break-resistant and
lighter than glass. All whilst
featuring a refined design
and appearance.

A strong mix for modern interior design,
whether it is used in kitchens, living
rooms or even shop fittings.

Smart glass in a tambour door

A solution to suit every taste:

RAUVOLET crystal-line frames the uniform finish of the front panel with a sophisticated metallic-look track system. RAUVOLET crystal-line complete uses RAUVISIO crystal throughout, including the track system and pelmets – avoiding any unwanted colour or material changes. An impressive combination that offers the perfect solution for every project.

Needs to be a specific colour? RAUVOLET crystal-line offers the ideal solution. With the vario option we can create a customised colour match for you, even for small order quantities – for surfaces and tambour doors.

RAUVOLET crystal-line

Product advantages

Appearance, quality, convenience – RAUVOLET crystal-line combines all of these in one.

The 50 mm slats create a harmonious, flat front panel that offers outstanding scratch resistance and strength for everyday use. It also impresses with fantastic running properties, ensuring it is easy to use. The perfect total package.

Design match

A seamless kitchen front – the result of REHAU's sophisticated and integrated approach to design. Kitchen fronts, edgebands and tambour doors can be perfectly combined regardless of whether they are matt or high gloss. This coordinated design concept provides you with added freedom when planning a project, not just in the kitchen, but in all areas of interior design.
