# Remodeled basement delivers undeniable style and elevated functionality with metallic finish

When Crae Mill was approached to remodel a basement in Grand Island, NE, their clients had a vision for the transformation but were unsure how to bring it to life. What they did know, however, was that they wanted a one-of-a-kind bar setup— something unique, functional and undeniably stylish.

As they were finalizing plans, the clients visited Crae Mill's showroom to explore material options. When they came across the REHAU display, they were immediately drawn to the understated elegance of RAUVISIO ferro Aegean Anchor. "The moment they held it up next to their luxury marble countertops and backsplash, it was a done deal— the pairing was nothing short of stunning," said Brandon Engleman, owner of Crae Mill.

He continued, "We chose REHAU's RAUVISIO ferro line not just for its sleek, modern look but for its practical benefits as well. The soft-touch finish, fingerprint resistance and impressive durability against impacts and scratches made it the perfect choice for a high-use space like this. Both we as bespoke cabinetmakers and our clients appreciated the combination of beauty and resilience, making this project one that truly stands out."

Collaborating closely with their clients to design every detail of the bar, Crae Mill incorporated high-end, custom features to elevate both aesthetics and functionality. Engleman shared, "Push-to-open hardware, hidden pocket doors, built-in ice drawers and a wine fridge were just the beginning. The ultimate luxury touch? A built-in cigar humidor drawer— an absolute showstopper."

**Project:** Ponderosa Lake Estates Home, Grand Island, NE
